1. This section contains details about imported documents.

1.1. Import

namespace	http://j2ee.netbeans.org/wsdl/CompositeService/CompositeServiceWSDL
location	CompositeServiceWSDL.wsdl
importType	http://schemas.xmlsoap.org/wsdl/

1.2. Import

namespace	http://j2ee.netbeans.org/wsdl/CreditCardModule/CreditCardWSDL
location	CreditCardModule/CreditCardWSDL.wsdl
importType	http://schemas.xmlsoap.org/wsdl/

1.3. Import

namespace	http://j2ee.netbeans.org/wsdl/CarRentalModule/CarRentalService
location	CarReservationModule/CarRentalService.wsdl
importType	http://schemas.xmlsoap.org/wsdl/

1.4. Import

|	
namespace	http://j2ee.netbeans.org/wsdl/HotelReservationModual/HotelReservationWSDL
location	HotelReservationModual/HotelReservationWSDL.wsdl
importType	http://schemas.xmlsoap.org/wsdl/

1.5. Import

|	
namespace	http://j2ee.netbeans.org/wsdl/FlightService/FlightServiceWSDL
location	FlightServiceModule/FlightServiceWSDL.wsdl
importType	http://schemas.xmlsoap.org/wsdl/

2. This section contains details about partner links.

2.1. PartnerLink 'CreditCardService'

name	CreditCardService
partnerLinkType	tns:CreditCardWSDL
partnerRole	CreditCardWSDLPortTypeRole

2.2. PartnerLink 'CarReservationService'

name	CarReservationService
partnerLinkType	tns:CarRentalService
partnerRole	CarRentalServicePortTypeRole

2.3. PartnerLink 'HotelReservation'

name	HotelReservation
partnerLinkType	tns:HotelReservationWSDL
partnerRole	HotelReservationWSDLPortTypeRole

2.4. PartnerLink 'FlightReservation'

name	FlightReservation
partnerLinkType	tns:FlightServiceWSDL
partnerRole	FlightServiceWSDLPortTypeRole

2.5. PartnerLink 'Customer'

name	Customer
partnerLinkType	tns:CompositeServiceWSDL
myRole	CompositeServiceWSDLPortTypeRole

3. This section contains all variables defined in the BPEL process.

3.1. Variable 'ReserveFlightTripResponse'

name	ReserveFlightTripResponse
messageType	tns:ReserveFlightTripResponse

3.2. Variable 'ReserveFlightTripRequest'

name	ReserveFlightTripRequest
messageType	tns:ReserveFlightTripRequest

3.3. Variable 'HotelReservationWSDLOperationResponse'

name	HotelReservationWSDLOperationResponse
messageType	tns:HotelReservationWSDLOperationResponse

3.4. Variable 'HotelReservationWSDLOperationRequest'

name	HotelReservationWSDLOperationRequest
messageType	tns:HotelReservationWSDLOperationRequest

3.5. Variable 'DebitCardSaleResponseForHotelReservation'

name	DebitCardSaleResponseForHotelReservation
messageType	tns:DebitCardSaleResponse

3.6. Variable 'DebitCardSaleRequestForHotelReservation'

name	DebitCardSaleRequestForHotelReservation
messageType	tns:DebitCardSaleRequest

3.7. Variable 'CarReservationOperationResponse'

name	CarReservationOperationResponse
messageType	ns4:CarRentalServiceOperationResponse

3.8. Variable 'CarReservationOperationRequest'

name	CarReservationOperationRequest
messageType	ns4:CarRentalServiceOperationRequest

3.9. Variable 'DebitResponse'

name	DebitResponse
messageType	tns:DebitCardSaleResponse

3.10. Variable 'DebitRequest'

name	DebitRequest
messageType	tns:DebitCardSaleRequest

3.11. Variable 'CreditCardSaleResponse'

name	CreditCardSaleResponse
messageType	tns:CreditCardSaleResponse

3.12. Variable 'CreditCardSaleRequest'

name	CreditCardSaleRequest
messageType	tns:CreditCardSaleRequest

3.13. Variable 'ReplyFromCompsitionService'

name	ReplyFromCompsitionService
messageType	tns:ReservationOperationResponse

3.14. Variable 'DetailsOfAllServices'

name	DetailsOfAllServices
messageType	tns:ReservationOperationRequest

4. Following section describes elements used in the BPEL process.

4.1. Sequence

4.2. Receive 'ReceiveFromCustomer'

name	ReceiveFromCustomer
